Forecast for Wednesday 15 May 2024

Weather: Some early morning low cloud to start, with a chance of some mist and fog patches in valleys under any clear spells. This clearing quickly through the morning allowing for much brighter conditions. Plenty of dry weather and bright, sunny spells with little cloud towards late afternoon. A very low risk of the odd shower in the afternoon. Light winds but a little breezy across exposed areas of the park and up on the highest peaks. Feeling warm in the sunshine.

Chance of cloud-free hill tops above 600m: 40% during the early hours of the morning, quickly rising to 90%.

Low cloud and visibility: Bases between 400-600m in the early hours, clearing by mid-morning leaving all cloud above peaks, with very little cloud in the skies by late afternoon. Moderate visibility in low cloud, perhaps poor amongst mist and fog in valleys, though improving quickly with excellent visibility across scenic outlooks of the park.

Forecast for Thursday 16 May 2024

Weather: Some early morning mist and fog in the valleys to start, though dissipating quickly as the sun rises. Plenty of bright sunshine and fine weather, with fair weather cloud bubbling up during the afternoon. A chance of showers, these may be heavy and possibly thundery. Another warm day with light winds.

Maximum wind: Generally southeasterly in direction, 5-10 mph, gusting 15 mph.

Chance of cloud-free hill tops 600m: 70% with a chance of cloud bases temporarily shrouding tops amongst heavy, thundery showers.

Low cloud and visibility: Some mist and fog possible to start, though dissipating quickly leaving excellent visibility for scenic outlooks of the park.

Temperature: **Valleys:** Plus 8 Celsius, rising to plus 19 Celsius.
At 600m: Plus 6 Celsius, rising to plus 12 Celsius.
Freezing level: Above summits.
